

## Environmental Initiatives Survey

<https://forms.gle/Rtn8wzqQ1n2mBJdY9>

The Manitoba Metis Federation Inc. (MMF) is currently working to develop a variety of environmental initiatives aimed to protect the land for continued use by the Manitoba Metis Community:

1. One Million Tree Project
2. Water Monitoring
3. Educational Programming

The Energy, Infrastructure & Resource Management Department has developed this survey to consult with the Manitoba Metis Community. The purpose of this survey is to:

- Better understand the needs of the Metis Nation in relation to boreal forest stewardship and climate change adaptation
- Build a list of interested landowners, citizens, educators, and volunteers
- Identify project locations
- Understand how best to reach the Community.

If you prefer to complete the survey via phone, contact our Outreach Officer, Tayler Fleming @ (204) 638-9485, or any of the Research Assistants located in the regional offices.
